

Corrigendum

In [1], the following typographical errors occurred:

In lines 4 and 6 of the Flow cytometry section on p. 75 the correct units should be 5 μ l, not 5 ml.

In line 3 of the Reverse transcription section on p. 75 the correct units should be 1 μ g, not 1 mg.

The heading at the top of the right-hand column on p. 75 should be Relative quantification by real-time PCR, not real-time PC.

The authors apologise for these errors.
