

Correction. In the article "Expression of apolipoprotein B mRNAs encoding higher- and lower-molecular weight iso-proteins in rat liver and intestine" by Gregory E. Tennyson, Charles A. Sabatos, Keiichi Higuchi, Nancy Meglin, and H. Bryan Brewer, Jr., which appeared in number 2, January 1989, of *Proc. Natl. Acad. Sci. USA* (86, 500–504), reproduction of Fig. 3 was so dark as to obscure the data. The figure should have appeared as follows:

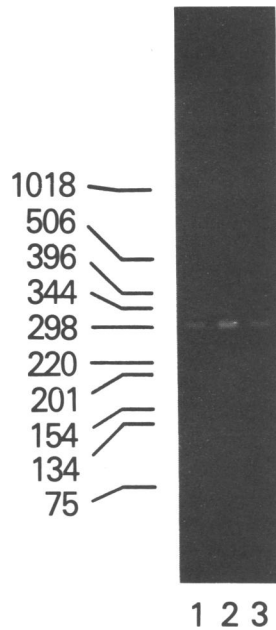

FIG. 3. Analysis of amplified rat apoB cDNAs. Amplified PCR products from rat genomic DNA (lane 1), rat liver RNA (lane 2), and rat intestinal RNA (lane 3) were electrophoresed through a 2% NuSieve/1% agarose gel and stained with ethidium bromide. Molecular sizes of a 1-kb ladder (Bethesda Research Laboratories) are shown on the left.
