

Correction

The authors of “Chromatin Environment of Histone Variant H3.3 Revealed by Quantitative Imaging and Genome-scale Chromatin and DNA Immunoprecipitation” (Mol. Biol. Cell [2010] 21, 1872–1884; originally published in *MBoC In Press* as 10.1091/mbc.E09-09-0839) wish to correct an error and an omission in Figure 4. Panels were omitted in Figure 4D, which are now included. Figure 4E included percentage values that were incorrect; the correct values are included in the revised Figure. The pie chart in Figure 4D, however, remains unchanged. The Figure legend is unchanged. The HTML and PDF versions were corrected on September, 30, 2010.
