2010. Attractive protein-polymer interactions markedly alter the effect of macromolecular crowding on protein association equilibria. *Biophys. J.* 99:914–923.

Equation 4 should read as follows:

$$K_a^o = \frac{a_{SOD \cdot site}}{a_{site} a_{SOD}} = K_a \frac{\gamma_{SOD \cdot site}}{\gamma_{site} \gamma_{SOD}}. \quad (4)$$

2010. Docking and fast fusion of synaptobrevin vesicles depends on lipid compositions of the vesicle and the acceptor SNARE complex-containing target membrane. *Biophys. J.* 99:2936–2946.

The last sentence of the Abstract should read:

Despite the smaller number of required SNAREs, the SNARE activation and fusion rates are almost as fast as previously reported in reconstituted PC/cholesterol bilayers, i.e., ~10 and ~20 ms, respectively.

The sentence carrying over from the bottom left column to the top right column of page 2936 should read:

For example, Lang et al. (10) and Sieber et al. (11) showed that Syx1a forms cholesterol-dependent clusters of ~75 molecules in plasma membranes of neuroendocrine pheochromocytoma 12 (PC12) cells.

Two errors were introduced in these sentences during production of the article.

2010. Effect of sensor domain mutations on the properties of voltage-gated ion channels: molecular dynamics studies of the potassium channel Kv1.2. *Biophys. J.* 99:L72–L74.

“Double gaps along *Shaker* S4 demonstrate omega currents at three different closed states” *Channels (Austin)* 4:93–100 was cited in our recent article as “*Channels*. 4:75–77”. The correct citation is “*Channels (Austin)* 4:93–100”.

Reference 25 should be cited as:

25. Gamal El-Din, T. M., H. Heldstab, ..., N. G. Greeff. 2010. Double gaps along *Shaker* S4 demonstrate omega currents at three different closed states. *Channels (Austin)*. 4:93–100.”

The name of author Gamal El-Din, T. M., was misspelled in the *Biophys. J.* 99(11) Correction on page 3859.
