2010. Elimination of thermodynamically infeasible loops in steady-state metabolic models. *Biophys. J*. 100:544–553.

There are two corrections:

In the Materials and Methods section that describes ll-FBA, the right side of the second and third equations should read $a_i = 0$ and $a_i = 1$. Corrected version:
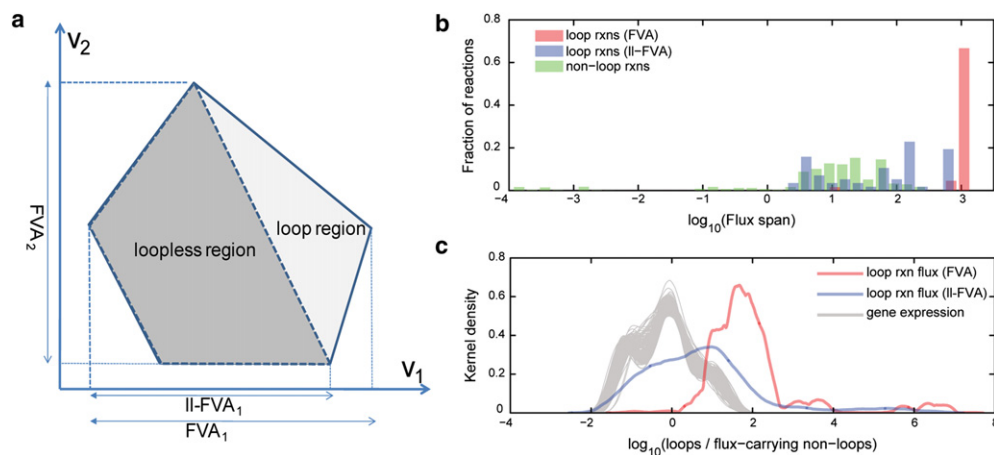

$$a_i = \begin{array}{ll} 1 & if \quad v_i > 0 \\ 0 & if \quad v_i < 0 \end{array}$$

$$G_i > 0 \quad if \quad a_i = 0$$

$$G_i < 0 \quad if \quad a_i = 1$$

$$N_{int} G = 0.$$

In Fig. 3 *c*, the colors of the red and blue lines were accidentally swapped while preparing the figure legend. The corrected version of Fig. 3:

Neither has any effect on the validity of the work, but were rather typographical errors in the manuscript preparation.
