

Corrigendum

A novel RNA binding protein, SBP2, is required for the translation of mammalian selenoprotein mRNAs

**P.R.Copeland, J.E.Fletcher, B.A.Carlson,
D.L.Hatfield and D.M.Driscoll**

The EMBO Journal, **19**, 306–314, 2000

The authors apologize for the incorrect numerical designation for the C-terminal fragment of SBP2 given as amino acids 280–846 on pages 307 and 310, the correct designation should read amino acids 399–846.
