DOI 10.1074/jbc.A110.169276

**The 1.5 Å crystal structure of human receptor for advanced glycation endproducts (RAGE) ectodomains reveals unique features determining ligand binding.**

HaJeung Park, Floyd G. Adsit, and Jeffrey C. Boyington

Floyd G. Adsit has been added as an author. His affiliation is the Quality Assurance Laboratory/Veterinary Medicine Section, NIEHS, National Institutes of Health, Research Triangle Park, North Carolina 27709.

NIEHS was incorrectly inserted into the correspondence address for Dr. Boyington. His correct address is Vaccine Research Center, NIAID, NIH, Bethesda, MD 20892.

We suggest that subscribers photocopy these corrections and insert the photocopies in the original publication at the location of the original article. Authors are urged to introduce these corrections into any reprints they distribute. Secondary (abstract) services are urged to carry notice of these corrections as prominently as they carried the original abstracts.
