

**ERRATUM**

**Rapid RNA sequencing: nucleases from *Staphylococcus aureus* and *Neurospora crassa* discriminate between uridine and cytidine**

by Guido Krupp and Hans J.Gross

Nucleic Acids Research 6, 3481-3490 August (1979).

On page 3483 the conditions for controlled digestion of end-labelled RNA with *Staphylococcus aureus* nuclease were not specified correctly.

Please note: Both digestions (at pH 3.5 and at pH 7.5) have to be performed in 7 M urea.
