

## Mitochondrial DNA and Y Chromosome Variation Provides Evidence for a Recent Common Ancestry between Native Americans and Indigenous Altaians

Matthew C. Dulik, Sergey I. Zhadanov, Ludmila P. Osipova, Ayken Askapuli, Lydia Gau, Omer Gokcumen, Samara Rubinstein, and Theodore G. Schurr\*

(The American Journal of Human Genetics 90, 229–246; February 10, 2012)

In the Supplemental Data that originally appeared online, in Table S4 the designation for Chelkan Q Y chromosomes was Q1a3a1c\*, which is incorrect. It should have been Q1a3a\*. In addition, the rows reporting the STR data in Table S4 showed the haplotype numbers out of order (the sequence for Q1a3a\* is 42–49 then 58, 59, 60, and 107). Also, the number of Altai-kizhi for haplotype 77 incorrectly appeared as 3; it should have been 4. Table S4 has been corrected online.
