Correction: LIM kinase 1 - dependent cofilin 1 pathway and actin dynamics mediate nuclear retinoid receptor function in T lymphocytes

Mohammad Ishaq^{1*}, Bor-Ruei Lin¹, Marjorie Bosche², Xin Zheng², Jun Yang², Dawei Huang², Richard A Lempicki², Angelica Aguilera-Gutierrez¹ and Ven Natarajan¹

Correction

Initially Dr Angelica Aguilera-Gutierrez was not included in the authors list of an article published in *BMC Molecular Biology* (2011, **12**:41) by Ishaq et al [1]. All the authors agree that Dr Aguilera-Gutierrez meets the criteria for authorship, and should be considered an author of the article [1].

Authors' contributions

MI and VN conceived the study. MI wrote the manuscript and carried out IF, and transcription studies. VN evaluated the data and revised the manuscript. LB carried out reporter assays with Nef constructs. MB carried out the gene array experiments. AA-G carried out the reporter assays with Nef constructs and Western blots. XZ, JY, DH, and RA participated in coordination and bioinformatic analysis of the gene array studies. All authors read and approved the final manuscript.

Submit your next manuscript to BioMed Central and take full advantage of:

- Convenient online submission
- Thorough peer review
- No space constraints or color figure charges
- Immediate publication on acceptance
- Inclusion in PubMed, CAS, Scopus and Google Scholar
- Research which is freely available for redistribution
