

Corrigendum

The pathway of *E. coli* RNA polymerase-promoter complex formation as visualized by footprinting

by Bernd Hofer, Dieter Müller and Hubert Köster

Nucleic Acids Research, 13, 5995-6013 (1985)

A mistake was made in the legend of Figure 2. The correct legend is printed below:

Figure 2: Footprints of RNA polymerase on the non-template strand of P VIII at different temperatures. "T" indicates that this lane contains a (dTMP)_n ladder (20). Note that at 37° C denatured DNA was added after 11 min to visualize complex decay. For further details see legend to figure 1.
