2006. Funneled landscape leads to robustness of cellular networks: MAPK signal transduction. *Biophys. J.* 91:L54–L56.

This article has been retracted: please see Elsevier Policy on Article Withdrawal (<http://www.elsevier.com/locate/withdrawalpolicy>).

This article has been retracted at the request of the Editor-in-Chief.

The editors have noted that there is a substantial overlap of text and content between this *Biophysical Journal* article and the following article: Wang, J., B. Huang, X. Xia, and Z. Sun. 2006. Funneled landscape leads to robustness of cell networks: yeast cell cycle. *PLoS Comput. Biol.* 2, e147. <http://dx.doi.org/10.1371/journal.pcbi.0020147>.

The submission of this paper was inconsistent with *Biophysical Journal* policy, which states: “Manuscripts submitted to *Biophysical Journal* (*BJ*) must be original; papers that have already been published or are concurrently submitted elsewhere for publication are not acceptable for submission. This includes manuscripts previously submitted to *BJ*, as well as material that has been submitted to other journals while *BJ* is considering the manuscript. If some part of the work has appeared or will appear elsewhere, the authors must give the specific details of such appearances in the cover letter accompanying the *BJ* submission. If previously published illustrative material, such as figures or tables, must be included, the authors are responsible for obtaining the appropriate permissions from the publisher(s) before the material may be published in *BJ*.”

We are therefore retracting the publication of the *Biophysical Journal* article.

The authors do not agree with this decision.
