

Gier B, Matveyenko AV, Kirakossian D, Dawson D, Dry SM, Butler PC. Chronic GLP-1 receptor activation by exendin-4 induces expansion of pancreatic duct glands in rats and accelerates formation of dysplastic lesions and chronic pancreatitis in the *Kras*^{G12D} mouse model. *Diabetes* 2012;61:1250–1262

In the published version of Fig. 7A, the original CREB blots were in error a duplicate of the GAPDH blots. The revised figure provides the correct CREB blots. The GAPDH and pCREB blots were correct in the original publication as was the scanned pCREB/CREB quantification, and so these are unchanged in the revised figure. The online version reflects these changes.
