

ERRATUM

GAL11 Protein, an Auxiliary Transcription Activator for Genes Encoding Galactose-Metabolizing Enzymes in *Saccharomyces cerevisiae*

YURIKO SUZUKI, YASUHISA NOGI, AKIO ABE, AND TOSHIO FUKASAWA

Laboratory of Molecular Genetics, Keio University School of Medicine, 35 Shinanomachi, Shinjuku-ku, Tokyo 160, Japan

Volume 8, no. 11, p. 4996 and 4997, Fig. 5: Recent work revealed errors at three positions in the 5' untranslated region of the *GAL11* nucleotide sequence, correction of which led to an elongation of the coding region beyond the previous 5' end by 117 codons. The corrected sequence is available from GenBank under accession number M22481.
