A mechanistic model for bromodeoxyuridine dilution naturally explains labelling data of self-renewing T cell populations

Vitaly V. Ganusov and Rob J. De Boer

J. R. Soc. Interface 10, 20120617 (2012; Published online 3 October 2012)
(doi:10.1098/rsif.2012.0617)

In equation (2.6), the two bottom lines feature an infinity sign (∞) instead of a proportional to sign (\propto). The two bottom lines should appear as follows:

$$= N(t)e^{-pt}(e^{pT} - 1) \propto e^{-dt}(e^{pT} - 1)$$

and $I_M(t) = \frac{I_T(t)}{N(t)} \propto e^{-pT}(e^{pt} - 1),$

This does not affect the findings of the paper.
