

## ERRATUM

### Modified Agar Medium for Detecting Environmental Salmonellae by the Most-Probable-Number Method

DAVID HUSSONG, NANCY K. ENKIRI, AND WYLIE D. BURGE

*Maryland Environmental Service, Beltsville Agricultural Research Center-West, and U.S. Department of Agriculture, Agriculture Research Service, Biological Waste Management and Organic Resources Laboratory, Beltsville, Maryland 20705*

Volume 48, no. 5, p. 1027, column 2, lines 43–44: “Salmonella-like colonies with polyvalent O and H antisera (Difco)” should read “Salmonella-like colonies were picked to triple sugar iron agar slants and confirmed with polyvalent O and H antisera (Difco).”

Page 1027, column 2, lines 62–63: “*S. newport* was counted with XL agar base with ampicillin (25 mg/ml) plus kanamycin and tetracycline (each 75 mg/ml), . . .” should read “*S. newport* was counted with XL agar base with ampicillin (25 µg/ml) plus kanamycin and tetracycline (each 75 µg/ml), . . . .”
