DOI 10.1074/jbc.A112.407833

Vitamin D up-regulates glucose transporter 4 (GLUT4) translocation and glucose utilization mediated by cystathionine- γ -lyase (CSE) activation and H₂S formation in 3T3L1 adipocytes.

Prasenjit Manna and Sushil K. Jain

It has come to our attention that the antibodies used for FACS analyses recognize the cytoplasmic domains of GLUT1 and GLUT4 and appear to interact with cell surface epitopes nonspecifically.

Authors are urged to introduce these corrections into any reprints they distribute. Secondary (abstract) services are urged to carry notice of these corrections as prominently as they carried the original abstracts.
