

ERRATUM

In: Rhoda DA, Murray DM, Andridge RR, Pennell ML, Hade EM. Studies with staggered starts: multiple baseline designs and group-randomized trials. *Am J Public Health*. 2011;101(11):2164-2169. doi:10.2105/AJPH.2011.300264.

There was an error in 2 equations. On page 2166, the third sentence in the second full paragraph of the third column should read:

“Hussey and Hughes observed that if τ^2 and $\sigma^2 = (\sigma_e^2/m)$ are known, where m is the number of members per group, then estimates of the fixed effects can be obtained with a weighted least squares analysis of the cluster means.²⁷”

On page 2167, Equation 3 should read:

$$(3) \text{Var}(\hat{\theta}) = \frac{I(\sigma_e^2/m)((\sigma_e^2/m) + T\tau^2)}{(IU - W)(\sigma_e^2/m) + (U^2 + ITU - TW - IV)\tau^2}$$
