This article has been withdrawn by the authors.

The antisense morpholino used to knock down CRD-BP expression in zebrafish was designed incorrectly. Therefore, the data shown in Fig. 5, *A* and *B*, which were generated using the morpholino, are invalid. No other results are affected by this error. We wish to withdraw the article and submit a corrected version for review after the proper experiment has been completed.

Authors are urged to introduce these corrections into any reprints they distribute. Secondary (abstract) services are urged to carry notice of these corrections as prominently as they carried the original abstracts.
