Correction

After publication of their article [1], the authors noted an error under the section “Density change and recurrence-free survival”. Where it currently reads “After adjusting for confounding factors, patients with MDRR $\geq 15\%$ had a higher risk of recurrence than patients with MDRR $<15\%$ (HR 1.60, 95% CI 1.02 to 2.50, $P = 0.041$) (Additional file 1, Table S5);” this should be changed to “After adjusting for confounding factors, patients with MDRR $<15\%$ had a higher risk of recurrence than patients with MDRR $\geq 15\%$ (HR 1.60, 95% CI 1.02 to 2.50, $P = 0.041$) (Additional file 1, Table S5).”
