The y-axis scale in Fig. 3 was incorrectly shifted upwards because of a coding error, and the unit of measure in the y-axis label was incorrectly reported as μV instead of μV^2 . The correct figure is shown below.

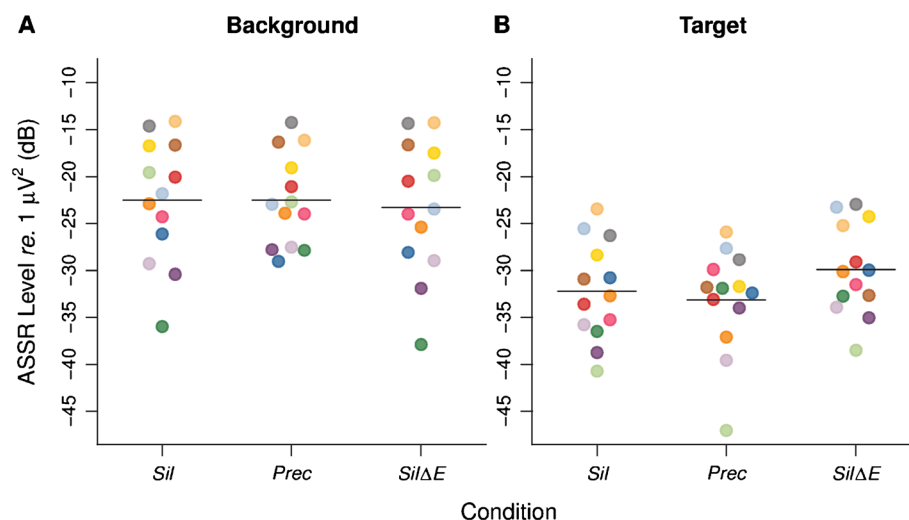

FIG. 3. **A** ASSR levels for the background components as a function of precursor type. **B** ASSR levels for the target component as a function of precursor type. Each *colored point* represents an individual listener. The color code is the same as in Figure 2. The horizontal segments represent the across-listener averages
