Vol. 158: 1628–1642, 2012

Pratelli R., Guerra D.D., Yu S., Wogulis M., Kraft E., Frommer W.B., Callis J., and Pilot G. The Ubiquitin E3 Ligase LOSS OF GDU2 Is Required for GLUTAMINE DUMPER1-Induced Amino Acid Secretion in Arabidopsis.

A discrepancy in the naming in two of the four artificial microRNAs (amiRNA) between the text and the supplemental data resulted in an error in Supplemental Figure S1 and Supplemental Table S2 in this article. In both files, the position and oligonucleotide data concerning amiRNAa and amiRNAd should be inverted. The supplemental data files have been updated on the *Plant Physiology* Web site to be in accordance with the text.
