

Identification and Validation of Genetic Variants that Influence Transcription Factor and Cell Signaling Protein Levels

Ronald J. Hause, Amy L. Stark, Nirav N. Antao, Lidija K. Gorsic, Sophie H. Chung, Christopher D. Brown, Shan S. Wong, Daniel F. Gill, Jamie L. Myers, Lida Anita To, Kevin P. White, M. Eileen Dolan,* and Richard Baker Jones*

(The American Journal of Human Genetics 95, 194–208; July 31, 2014)

The funding information was unfortunately omitted from the published version of this article. The following text should have appeared in the Acknowledgments. The authors regret this omission.

This work was supported by an award from the Cancer Research Foundation (R.B.J.), The Illinois Department of Health (R.B.J.), the NIH NIGMS GM61393 (M.E.D.), Breast SPORE P50 CA125183 (M.E.D.), RO1 CA136765 (M.E.D.), Specialized Center of Research Grant from the Leukemia and Lymphoma Society (M.E.D.), NIH TL1 RR25001 (A.L.S.), and NIH T32 GM07197 (R.J.H.). The funders had no role in study design, data collection and analysis, decision to publish, or preparation of the manuscript.
