

## Correction

**I**N THE SEPTEMBER, 2013 ISSUE OF Zebrafish, (vol. 10, no. 3; 389–400) *Impaired Cardiovascular Function Caused by Different Stressors Elicits a Common Pathological and Transcriptional Response in Zebrafish Embryos*, the Acknowledgments section was not complete and therefore, incorrect. It should have read as follows:

The author would like to thank Warren Heideman from University of Wisconsin – Madison for his kind advise on this paper, and Craig A. Struble from Marquette University, Milwaukee, Wisconsin for his assistance in genome-wide computational work to identify the enriched transcriptional factor recognition motifs by CLOVER program.

This work was supported by National Institute of Health grant R01-ES012716 to W.H., Sea Grant project numbers R/BT-16 and R/BT-17 to W.H., National Sciences Foundation of China grant 30971106 to J.C., and a grant from Scientific Research Foundation for Returned Overseas Chinese Scholars of Education Ministry of China ([2010] 1561) to J.C.

The online version of this article has been corrected. The author apologizes for this omission.
