

Erratum

In the November 2002 issue of the *Journal*, the article “A Gene Mutated in Nephronophthisis and Retinitis Pigmentosa Encodes a Novel Protein, Nephroretinin, Conserved in Evolution,” by Otto et al. (71:1161–1167), contained the following error in the Electronic-Database Information sec-

tion: Preliminary BankIt numbers should have been replaced by permanent GenBank numbers for full-length *NPHP4* cDNAs in human, mouse, and *Caenorhabditis elegans* (accession numbers AF537130, AF537131, and Z81579, respectively). The authors regret this error.
