

Cold Spring Harb Perspect Med 4: a013888 (2014)

Cardiac Cell Lineages that Form the Heart

Sigolène M. Meilhac, Fabienne Lescroart, Cédric Blanpain, and Margaret E. Buckingham

The branchial arches of the developing embryo were listed as “1,2,3,5,6” in the original version of this article (line 24, p. 5 of the PDF). The arches should have instead been listed as “1,2,3,4,6” because arch 5 does not develop beyond the anlage stage. The authors apologize for the error. The PDF and HTML versions of the article have now been corrected.
