# Correction: Cell Atavistic Transition: Paired Box 2 Re-Expression Occurs in Mature Tubular Epithelial Cells during Acute Kidney Injury and Is Regulated by Angiotensin II

Yushen Jiang, Tang Jiang, Juan Ouyang, Qingsong Zhou, Yanlan Liang, Yingpeng Cui, Peisong Chen, Bin Huang

In [Fig 3A](#) of the original published article the panels for beta-actin mRNA were duplicated for the Sham and IRI treatment. The authors apologize for this error and have provided the correct figure here.

**Fig 3. Pax2 expressions in renal cortex detected by RT-PCR and western blot.** The mRNA (A) and protein (B) levels of Pax2 in renal cortex were detected via RT-PCR and western blot. Pax2 was expressed in the IRI groups 48–96 h after IRI operation (\* $P < 0.05$ , IRI compared with sham), while Pax2 could not be detected in renal cortex of animals in sham-operation groups.
