

CORRECTION

Correction: Interleukin 21 Signaling in B Cells Is Required for Efficient Establishment of Murine Gammaherpesvirus Latency

The *PLOS Pathogens* Staff

There is an error in [Table 1](#), which was introduced during the typesetting process. The publisher apologizes for this error. The data given for day 20, Total YFP+ PCs (SEM) in the IL21R^{-/-} mice reads: “3”. It should read: “448 (83)”. Please see the corrected table [here](#).
