## June 2015 Issue, vol. 104 (6), pages 433-442

In the original article "I Brazilian Registry of Heart Failure - Clinical Aspects, Care Quality and Hospitalization Outcomes", published in the June 2015 of the Arquivos Brasileiros de Cardiologia [Arq Bras Cardiol. 2015; 104(6): 433-442], suffered the following correction:

Correcting the text:

In the analysis of the etiologies by region, patients from the South, Southeast and Northeast showed a predominance of the ischemic etiology (33.6%, 32.6%, and 31.9%, respectively). In patients in the Northern region the hypertensive etiology (37.2%) predominated, while among patients in the Northern region the Chagasic etiology predominated (42.4%) (Table 2).

And considering the following text:

In the analysis of the etiologies by region, patients from the South, Southeast and Northeast showed a predominance of the ischemic etiology (33.6%, 32.6%, and 31.9%, respectively). In patients in the Northern region the hypertensive etiology (37.2%) predominated, while among patients in the west-central region the Chagasic etiology predominated (42.4%) (Table 2).
