The Prognosis of Nasopharyngeal Carcinoma Involving Masticatory Muscles: A Retrospective Analysis for Revising T Subclassifications: Erratum

In the article “The Prognosis of Nasopharyngeal Carcinoma Involving Masticatory Muscles: A Retrospective Analysis for Revising T Subclassifications”,¹ which appeared in Volume 94, Issue 4 of *Medicine*, statistical corrections were required to the Local Relapse-free Survival Rate and Regional Relapse-free Survival Rate panels of Figure 4. In addition, relevant data in Table 3 has been moved one column to the right. The article has since been corrected online.
