

## CORRIGENDUM

# Long telomeres are associated with clonality in wild populations of the fissiparous starfish *Coscinasterias tenuispina*

A Garcia-Cisneros, R Pérez-Portela, BC Almroth, S Degerman, C Palacín and H Nilsson Sköld

*Heredity* (2015) **115**, 480; doi:10.1038/hdy.2015.75

---

**Correction to:** *Heredity* (2015) **115**, 437–443; doi:10.1038/hdy.2015.43; published online 20 May 2015

Since the online publication of the above articles, the authors have noticed that the acknowledgements did not include the project CTM2013-48163. The Acknowledgements section should read as follows:

### ACKNOWLEDGEMENTS

We thank Dr Owen Wangensteen for his support during sampling and for his fruitful ideas. We are also indebted to Dr Jose Carlos Hernandez, Dr Sabrina Clemente and the staff of the University of La Laguna for their help and logistic support during sampling in Tenerife. We thank Susann Haraldsson,

Umeå, for laboratory assistance with qPCR. This research was financially supported by a PhD fellowship FPI-MICINN (BES-2011-044154) (ACG), the European ASSEMBLY project (227799), the Swedish Royal Academy of Sciences (ACG) and the Spanish Government project CTM2010-22218-C02 and CTM2013-48163. The research was also supported by a 'Juan de la Cierva' contract from the Spanish Government (RPP) and by the Adlerbertska Research Foundation (HNS).

The authors apologise for any inconvenience caused by this error.

This error has now been rectified, and the corrected article appears in this issue. The html and online pdf versions have also been rectified, and now carry the corrected paper.
