## A corrigendum on

### Ontogeny of innate T lymphocytes – some innate lymphocytes are more innate than others

by Vermijlen D, Prinz I. *Front Immunol* (2014) 5:486. doi: 10.3389/fimmu.2014.00486

We have found an error in our review article “Ontogeny of innate T lymphocytes – some innate lymphocytes are more innate than others.”

On page 6, under the section “Mucosa-associated invariant T cells”:

“In humans, this TCR consists of V $\alpha$ 7.2–J $\alpha$ 22. . .”

Instead of “J $\alpha$ 22,” this should be “J $\alpha$ 33.”

The same error is present in Table 1, under “MAIT – Human,” row “(Semi-)invariant TCR”: should be J $\alpha$ 33.
