Corrigendum: Robustness and period sensitivity analysis of minimal models for biochemical oscillators

Angélica Caicedo-Casso, Hye-Won Kang, Sookkyung Lim & Christian I. Hong

In this Article, the images depicting the Wiring Diagarms and Numerical solutions for models 1 to 5 have been omitted. The correct Table 1 appears below.
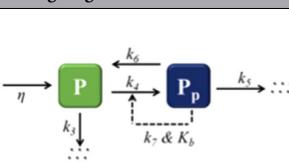

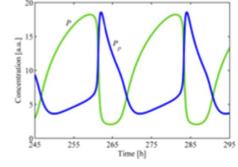

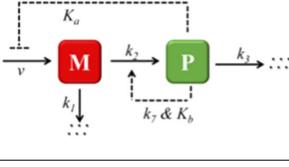

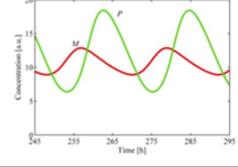

Wiring diagram	Systems of ODEs	Numerical solutions
	$$\frac{dP}{dt} = \eta - (k_3 + k_4)P + k_6 P_p - \frac{k_7 P P_p^n}{K_b^n + P_p^n}$$ $$\frac{dP_p}{dt} = k_4 P - (k_5 + k_6)P_p + \frac{k_7 P P_p^n}{K_b^n + P_p^n}$$	
	$$\frac{dM}{dt} = \frac{\nu}{1 + (P/K_a)^m} - k_1 M$$ $$\frac{dP}{dt} = k_2 M + \frac{k_7 M P^n}{K_b^n + P^n} - k_3 P$$	
	$$\frac{dM}{dt} = \frac{\nu}{1 + (P/K_a)^m} - k_1 M$$ $$\frac{dP}{dt} = k_2 M - \frac{k_3 P}{1 + (P/K_b)^n}$$	
	$$\frac{dM}{dt} = \frac{\nu}{1 + (P_p/K_a)^m} - k_1 M$$ $$\frac{dP}{dt} = k_2 M - k_3 P$$ $$\frac{dP_p}{dt} = k_4 P - k_5 P_p$$	
	$$\frac{dM}{dt} = \frac{\nu}{1 + (P_p/K_a)^m} - k_1 M$$ $$\frac{dP}{dt} = k_2 M - (k_3 + k_4)P + k_6 P_p - \frac{k_7 P P_p^n}{K_b^n + P_p^n}$$ $$\frac{dP_p}{dt} = k_4 P - (k_5 + k_6)P_p + \frac{k_7 P P_p^n}{K_b^n + P_p^n}$$	
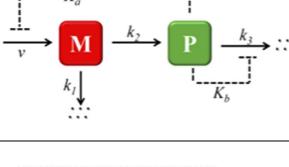

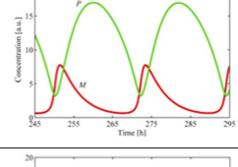

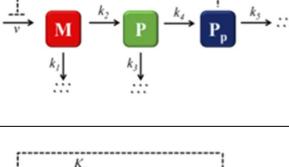

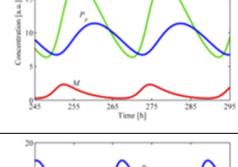

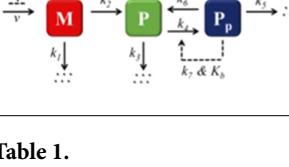

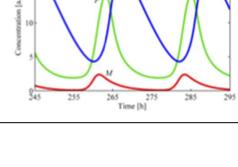

Table 1.

1

In Table S5, the transition values for Reaction 1 $'M \to M+1'$ and Reaction 2 $'M \to M-1'$ were incorrectly given as $'M \to M-1'$ and $'M \to M+1'$ respectively.
