Acknowledgements

The authors would like to thank the patients and their families for their generosity and goodwill, as without their support none of this research would have been possible. This work was undertaken at UCLH/UCL with a proportion of funding from the Department of Health's NIHR Biomedical Research Centres funding scheme. The Queen Square Brain Bank, UCL Institute of Neurology is supported by the Reta Lila Weston Institute of Neurological

Studies and the Progressive Supranuclear Palsy (Europe) Association. One of the cases analysed in this study was donated to the London neurodegenerative diseases brain bank, which receives support from the MRC and is part of the brains for dementia research network.

The authors apologize for this error.
