In the Results section under subheading ‘*In vivo* anticancer activity against Ehrlich ascites Carcinoma (EAC)’

“The experimental results showed that 3-AWA reduced Ehrlich ascites carcinoma by 71.75% at 10 mg/kg intraperitoneal dose in comparison to the tumor growth inhibition of 87.4% in 5-FU (22 mg/kg i.p.) treated group.”

should read:

“The experimental results showed that 3-AWA reduced Ehrlich ascites carcinoma by 70.5% at 10 mg/kg intraperitoneal dose in comparison to the tumor growth inhibition of 87.4% in 5-FU (22 mg/kg i.p.) treated group.”

In the legend of Table 1

“Values are mean  $\pm$  S.E. (n = 7, 10 for control).”

should read:

“Values are mean  $\pm$  S.E. (n = 8).”
