The TNF- α /NF- κ B signaling pathway has a key role in methamphetamine-induced blood-brain barrier dysfunction

Vanessa Coelho-Santos, Ricardo A Leitão, Filipa L Cardoso, Inês Palmela, Manuel Rito, Marcos Barbosa, Maria A Brito, Carlos A Fontes-Ribeiro and Ana P Silva

Journal of Cerebral Blood Flow & Metabolism 2015; 35: 1260–1271.

The support of Pest UID/NEU/04539/2013 was not included in the Acknowledgements of the original published version of this paper. The Acknowledgements should have read as follows:

We would like to acknowledge Madalena Esteves for her technical support in western blot and immunohistochemistry studies, and to Dr Flávio Reis for the technical support in mice blood collection. This work was supported by Project PTDC/SAUFCF/098685/2008 from Foundation for Science and Technology (FCT Portugal) co-financed by COMPETE and FEDER funds, Pest-C/SAU/UI3282/2013-2014 and Pest UID/NEU/04539/2013. Also, PhD fellowships SFRH/BD/84408/2012 and SFRH/BD/85556/2012 from FCT Portugal co-financed by QREN.
