

Erratum: Christ Siemens Touraine syndrome: Two case reports and felicitous approaches to prosthetic management

In the article, “Christ Siemens Touraine syndrome: Two case reports and felicitous approaches to prosthetic management”, which appeared in the pages 274-276, Issue 2, Vol 6 of Contemporary Clinical Dentistry⁽¹⁾, the “Conflict of Interest” section is incorrectly written as “None declared” and instead it should read as the following:

“The authors have obtained the necessary patient consent forms where the patients have given their approval for participation in the investigation, followed by representation in the concerned article. The patients do understand that the authors will ensure that their identities won’t be revealed, however anonymity cannot be guaranteed.”

This has now been corrected and reposted online.
