“This work was financially supported by the Department of Science and Technology, Technology system development (DST-TSD) grant no. PT/2011/178-G, Government of India, New Delhi under “Development of cadmium free high-luminescence III-V and I-III-VI semiconductors based core-shell nanocrystals as nanoprobe for bioimaging applications” for providing the microwave-assisted synthesis facility in our lab. We also thank Dr. Shamima Hussain, UGC-DAE, India for XPS analysis and the Central Instrumentation Facilities (CIF), Pondicherry University for optical and FTIR analysis”.

“This work was financially supported by the Department of Science and Technology, Technology system development (DST-TSD) grant no. PT/2011/178-G, Government of India, New Delhi under “Development of cadmium free high-luminescence III-V and I-III-VI semiconductors based core-shell nanocrystals as nanoprobe for bioimaging applications” for providing the microwave-assisted synthesis facility in our lab. We thank Dr. V. Ganesan and Dr. Shamima Hussain, UGC-DAE, India for XPS analysis and the Central Instrumentation Facilities (CIF), Pondicherry University for optical and FTIR analysis. We also thank the help from Dr. R. S. Jayasree, and her student S. Hema, Biophotonics & Imaging Lab, SCTIMST, DST-Unit, Trivandrum, India for optimizing *in vitro* studies in L929 and MCF7 cell lines using our CIZS nanocrystals. We also thank the help from Dr. G. Dhinakar Raj and Mr. T.M. Chozhavel, TRPV, Madhavaram, Chennai, India for confocal imaging of our CIZS nanocrystals labelled VERO cell lines”.
