J Wrist Surg 2016;5:171.

The August issue features a special focus on the interosseous membrane and how it affects the distal radioulnar joint. We also have several interesting scientific articles, case reports, and anatomy articles. This will be my last issue as the Editor-in-Chief. Toshi Nakamura has agreed to fill this position accompanied by the help of Guillaume

Herzberg and Steven Tham. It has been a great pleasure being involved in the birth of the JWS and watching it grow over the past 5 years. I'd like to thank the Thieme staff for all of their help including Graham Brumfield, Kelly Coffey, Kenny Chumbley, Aditi Singh Painuly, and Mitali Vyas.
