There are several amendments to this article:

Reference 23 should be Betts D. Acupressure techniques for use during childbirth and pregnancy. <http://acupuncture.rhizome.net.nz> (accessed 2015 2005).

The sentence: Acupressure,^{22 24} which uses six main points for use during labour selected from a previously published protocol.²³ These focus on hormone release for labour progression, augmentation of contractions, pain relief, nausea and positioning of baby.

Should read: Acupressure, ^{22 24} which uses six main points for use during labour selected from a previously published protocol.²³ The participants were given DVDs of the acupressure protocol²³ to take home for practice. These focus on hormone release for labour progression, augmentation of contractions, pain relief, nausea and positioning of baby.

The sentence: The LAS contains 29 questions with a seven-point Likert scale ranging from '1=almost always', to '7=rarely'. Therefore, scores could theoretically range from 29, indicating the highest control possible, to a high score of 203 indicating the lowest agency possible.
