

Corrigendum

In the article by J. K. Biedler *et al.* (*G3: Genes|Genomes|Genetics* 5: 157–166) entitled “Maternal Germline-Specific Genes in the Asian Malaria Mosquito *Anopheles stephensi*: Characterization and Application for Disease Control,” Vanessa M. Macias of the Department of Molecular Biology and Biochemistry, University of California, Irvine, California 92697-3900, performed embryonic injections to generate transgenic lines and was inadvertently omitted from the list of authors. This omission has now been corrected.
