

CORRECTION

# Correction: Virtual Morality: Transitioning from Moral Judgment to Moral Action?

Kathryn B. Francis, Charles Howard, Ian S. Howard, Michaela Gummerum, Giorgio Ganis, Grace Anderson, Sylvia Terbeck

There is an error in [Table 3](#). The beta coefficients (B) for the constant and trait are incorrectly swapped. The authors have provided a corrected table here.

**Table 3. Logistic regression with Honesty-Humility as predictor**

		B (SE)	95% CI for Odds Ratio		
			Lower	Odds Ratio	Upper
Included					
Constant		1.19 (0.67)			
HEXACO					
	H	-2.53* (1.27)	0.07	0.08	0.97

Note: H = Honesty-Humility.  $R^2 = .25$  (Hosmer & Lemeshow),  $.26$  (Cox & Snell),  $.37$  (Nagelkerke). *Model*  $\chi^2(1) = 6.01, p = .01$ .

\* $p = .05$ . (SE) = standard error.
