

CORRECTION

Correction: Arabidopsis Flower and Embryo Developmental Genes are Repressed in Seedlings by Different Combinations of Polycomb Group Proteins in Association with Distinct Sets of Cis-regulatory Elements

Hua Wang, Chunmei Liu, Jingfei Cheng, Jian Liu, Lei Zhang, Chongsheng He, Wen-Hui Shen, Hong Jin, Lin Xu, Yijing Zhang

There are two errors in [S1 Text](#) under the subheading "Affinity purification". In the sixth sentence of this paragraph, "2.5 hours with 200 ml of Dynabeads" should read "2.5 hours with 200 μ L of Dynabeads". In the last sentence of this paragraph, "incubation with 500 ml of elution buffer" should read "incubation with 500 μ L of elution buffer". Please view the correct [S1 Text](#) below.

Supporting Information

S1 Text. Detailed description of experimental procedures for FIE complex purification and tandem mass spectrometry analyses.
