The publisher regrets that the following information was inadvertently omitted from the original publication.

Acknowledgments: This manuscript is based upon work supported by the Department of Veterans Affairs, Veterans Health Administration, Office of Research and Development, Mental Health Quality Enhancement Research Initiative and the Center for Integrated Healthcare.

Compliance with ethical standards All procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, as revised in 2000. Informed consent was obtained from all patients for being included in the study.

Disclaimer: The views expressed in this article are those of the authors and do not necessarily reflect the position or policy of the Department of Veterans Affairs or the United States government.

Conflict of interest: None of the authors have any conflict of interest to report.
