ERRATUM

Erratum to: 86 successful births and 9 ongoing pregnancies worldwide in women transplanted with frozen-thawed ovarian tissue: focus on birth and perinatal outcome in 40 of these children

Annette Klüver Jensen[1] · Kirsten Tryde Macklon[2] · Jens Fedder[3] · Erik Ernst[4] · Peter Humaidan[5] · Claus Yding Andersen[1]

Published online: 24 January 2017

Erratum to: J Assist Reprod Genet (2016)
DOI 10.1007/s10815-016-0843-9

The original version of this article unfortunately contained errors in the Discussion section as follows:

1) The whole paragraph starting "It is currently impossible to obtain a complete…" should be replaced with the below paragraph:
   It is difficult to obtain a complete picture of this procedure's success rate due to the absence of reports of non-pregnancies in the peer-reviewed papers [43]. The Danish experience is that the success rate of having a positive pregnancy test among the Danish women, who had a pregnancy wish, was 63%. Furthermore, 31% of the women with a pregnancy wish succeed in conceiving at least one child and 50% of the pregnancies were naturally conceived [8].
2) The last paragraph of the Discussion section should be removed.

The original article was corrected.

The online version of the original article can be found at http://dx.doi.org/10.1007/s10815-016-0843-9.
