Errata

Volume 27 No. 2, April 1993

Pages 111–5. West: A look at the statistical overview

The legends to Figs 1 and 3 were interchanged.

Fig 1 shows a statistical overview of seven cohort studies in acute myeloblastic leukaemia.

Fig 3 gives a statistical overview of 17 trials of rehabilitation after myocardial infarction.

Page 172. Moxon: **Microbes, molecules and man**

Fig 5 – the second sentence of the legend should read: 'The *bex* genes (A,B,C,D, indicated by light grey rectangles) are provisionally considered to be required for export of the polysaccharide from across the cytoplasm membrane.'
