Erratum to: Influence of Pokémon Go on physical activity levels of university players: a cross-sectional study

Fiona Y. Wong*

Erratum

Unfortunately, the original version of this article [1] contained a few errors. The following sentence from the abstract: “The players spent a mean of 108.19 ± 158.21 min/week to walk/jog in order to play the game which is equivalent to burning 357 kcal/week for a 60-kg person walking a moderate pace.” should have been clearer. This has now been corrected to “**Players who never or rarely walked/jogged before** spent a mean of 108.19 ± 158.21 min/week to walk/jog in order to play the game which is equivalent to burning 357 kcal/week for a 60-kg person walking a moderate pace.”

Furthermore, the following sentence was also incorrect: “39.5% claimed that they were players (still playing Pokémon Go at the time of the survey), 30.9% claimed that they were ex-players (played before but had not played for at least 7 consecutive days), and the remaining 29.6% were non-players (never played the game) (Table 1).” This should have been “**37.7%** claimed that they were players

(still playing Pokémon Go at the time of the survey), **27.6%** claimed that they were ex-players (played before but had not played for at least 7 consecutive days), and the remaining **34.6%** were non-players (never played the game) (Table 1).” The changes to the sentences are in boldface for clarity.

The online version of the original article can be found under doi:[10.1186/s12942-017-0080-1](https://doi.org/10.1186/s12942-017-0080-1).
