

Integrative genomics of gene and metabolic regulation by estrogen receptors α and β , and their coregulators

Zeynep Madak-Erdogan , Tze-Howe Charn, Yan Jiang, Edison T Liu, John A Katzenellenbogen & Benita S Katzenellenbogen

Correction to: *Mol Syst Biol* (2013) 9: 676. DOI 10.1038/msb.2013.28 | Published online 18 June 2013

Following an inquiry from the journal *Molecular Systems Biology* regarding the presentation of data in Fig 7A, the authors and the journal have examined this figure and the original data upon which it was based. The authors wish to withdraw Fig 7A and the related conclusions in the paper, based on the fact that the data were altered inappropriately. As a consequence, the specific conclusions

stating that ER β exerts an effect on MAPK signaling cannot be supported by these data. No other panels or figures are withdrawn, and all of the other data and conclusions in the paper remain unchanged, including the title and abstract of the study.

All authors concur with this statement and wish to apologize for the inconvenience caused.
