Correction to Supporting Information for “Behavioral contagion during learning about another agent’s risk-preferences acts on the neural representation of decision-risk,” by Shinsuke Suzuki, Emily L. S. Jensen, Peter Bossaerts, and John P. O’Doherty, which appeared in issue 14, April 5, 2016, of *Proc Natl Acad Sci USA* (113:3755–3760; first published March 21, 2016; 10.1073/pnas.1600092113).

The authors wish to note the following: “We have noticed an error in the description of the fMRI analysis on page 2 of Supporting Information (right column, second full paragraph, lines 2–3), under the paragraph heading ‘GLM 1.’ In the original version of Supporting Information, the parametric regressor representing risk was described as the ‘variance of reward,’ whereas the accurate description of the regressor that was used in the analysis is the ‘standard deviation of reward.’” The SI has been corrected online.
