(Neuron 80, 1277–1289; December 4, 2013)

We would like to correct a label in Figure S2 in the Supplemental Information of our recent publication. In panel B of this figure, the rate map under the label “trajectory 2” incorrectly corresponded to “trajectory 3” and vice-versa, as it can be ascertained by their shape. We have now corrected the panels’ positions in the Supplemental Information online. We present our apologies and thank the reader who pointed this out for us.

The Genetics of Major Depression

Jonathan Flint* and Kenneth S. Kendler

(Neuron 81, 484–503; February 5, 2014)

The original publication contained errors in gene nomenclature in Table 2. The table has now been corrected in the article online.
